About these learning resources

Crewbright printable guide | Reviewed 11 November 2026

Our resources help venue teams understand everyday tasks and prepare useful workplace conversations. We use official guidance for factual claims and provide original examples and worksheets to help apply the topic.

How resources are prepared

Each guide identifies its scope and sources. Fictional scenarios are labelled. Worksheets offer suggested record structures for a venue to adapt to its own procedures. Course descriptions distinguish awareness learning from practical competence and qualifications.

Keeping information current

Review information when the underlying guidance or the operation changes. Dates record the stated editorial check. Readers should use the current official source and the venue's own instructions where a task depends on a specific product, site or jurisdiction.

Respectful use of information

Use only the personal details needed for the working record, restrict access appropriately and follow the business's retention arrangements. Completed worksheets should be kept in the venue's approved system.
